Glossary	
Terms	Definition
Status	Conceptualized = The need for rule/ guideline has already been acknowledged but development process has not been initiated In progress = Rule development in process (e.g. discussion paper in formulation stage) Review = Proposed review of existing regulation. Rule change may/ may not be formulated after review process.
Indicator	Planning and Procurement = Planning and procurement of required technical resources
	Assessment/ Review= Review of related policies and documents, benchmarking study, etc. E.g. Review of practices of South Asian countries during grid code development. Rule/ Guideline development= Drafting phase of guidelines/ directives/ policies
	Draft rules/ Discussion paper= Drafting of interim regulatory instrument for stakeholder discussion and feedback
$\star$	Stakeholder consultation & review= Comprehensive engagement with key stakeholders for their review and feedback
$\otimes$	Rule/ guideline finalization = Finalization of rule/ guideline after necessary discussion with key stakeholders and review.
•	Implementation= Make necessary arrangements to enforce the rules. E.g. IT related system development for monitoring. Estimated go-live= Roll out of the regulatory instruments after necessary implementation arrangement.
